### WIRELESS WALL SOUNDER VAD

The Wireless Wall Sounder VAD combines the Wireless Wall Sounder Module with the Conventional Wall Sounder VAD (each sold separately). The Wireless Wall Sounder VAD is a EN 54-3 (Type B) and EN 54-23 compliant visual/alarm device, equipped with 3 levels of volume adjustment, high output LED beacon, and 32 recognised tones which can be set locally at the sounder. The wireless wall sounder VAD, once properly connected to a wireless system on a compatible loop, is fully controlled by the panel and benefits from an extensive range of intelligent control, test and monitoring functionality. Adaptive radio signal processing algorithms ensure the highest levels of life safety and reliability.

## KEY FEATURES

- Bi-directional wireless communication
- 32 tones settings selectable via onboard dip switches
- On site adjustable volume settings
- Silent sounders setting for beacon only use
- Waterproof certified to IPX5
- 200 m communication range (in open air)
- 3 year expected battery life including weekly test
- Utilises standard low cost lithium battery technology
- Also available in white
- 3rd party approval to EN54-3 (type B) and EN54-23
- 5 year product warranty

## TECHNICAL INFORMATION

## TECHNICAL SPECIFICATION

• Operating frequency range	868 – 870 MHz
• Max radiated power	14dBm (25mW)
• Acoustic Frequency range	400-2900 Hz
• Maximum acoustic Output	100 dB(A) ± 3
• Visual Alarm Device (VAD) colour	White
• Visual Alarm Device (VAD) frequency	0.5 Hz
• VAD flash coverage	W-2.5-7 (EN 54-23)
• IP rating	X5
• Batteries	2 x CR123A (3 V & 1.2 Ah)
• Max humidity (non condensing)	85% RH
• Operating Temperature	-10°C to +55°C
• Weight	380 g
• Dimensions	132 mm x 126 mm x 92 mm

## STANDARDS & APPROVALS

- BS EN54-3 (Type B): Fire Alarm Device, Sounders
- BS EN 54-23: Fire Alarm Devices, Visual Alarm Devices
