

HYFIRE WIRELESS FIRE SYSTEMS

FAST AND EFFECTIVE WIRELESS FIRE PROTECTION

MINIMAL RESOURCES AND TIME REQUIRED

Our partners can increase their revenue without a major increase in labour. An example of this has been one of our partners increasing revenue by 25% whilst only increasing labour by 5%.

90%

LESS CABLING THAN WIRED INSTALLATIONS

minimal cabling and labour required therefore less cost

SITE SURVEY ASSESSMENT

no surprises or delays that can change installation and even system design and performance

10

YEARS BATTERY LIFE

superior performance with less maintenance

EN54-25

FULLY APPROVED BY ACCREDITED THIRD PARTIES

for maximum safety and reliability

OFF-SITE PRE-PROGRAMMING

increase the speed of installation and reduce time on site.

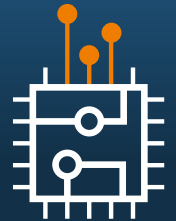

FLEXIBLE SYSTEMS

which can change to meet building requirement changes down the line.

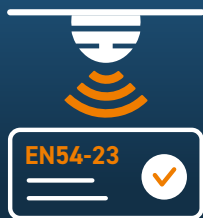

FUTURE PROOF TECHNOLOGY

without having to rewire, change or add fire devices effortlessly.

WIRELESS VADS

to make compliance to EN54-23 simple

DIFFICULT SITES

Simple solution to many installation challenges (ornate ceiling, asbestos contaminated, remote room no cable access)

20 YEARS EXPERIENCE
in wireless fire solutions

2+ MILLION DEVICES INSTALLED WORLDWIDE
tried and tested technology
